areeb'sportfolio.vercel.app/

SUMMARY

Computer Science graduate from FAST NUCES, Karachi, specializing in software engineering and AI-driven applications. Had gain some experience in Microsoft Dynamics 365 F&O and CRM. Experienced in building scalable backend systems and ML-powered solutions using SQL, Python, Node.js, Scikit-learn, and PyTorch. Skilled in developing LLM-powered applications with RAG pipelines, LangChain, and CrewAI, with hands-on experience in generative AI and intelligent automation systems.

TECHNICAL SKILLS

- Languages: Python, MYSQL, JavaScript
- C/C++, HTML, CSS
- Tech Stack: FastAPI, NodeJs, ExpressJS, React, Dynamics 365
- Infrastructure: AWS, Docker, Linux, Kubernetes, Github Actions
- AI / ML: Langchain, CrewAI, OpenAI SDK, RAG Systems

PROFESSIONAL EXPERIENCE

Software Engineer Intern

Feb 2026 – Present

FastPace Dynamics

- Receiving structured training in Microsoft Dynamics 365.
- Learning CRM concepts, system configuration, and business workflows.
- Working in Backened workflows in Finance & Operations.
- Designed and facilitated workflows for International Clients.

IT Management Trainee

Jan 2026 – Feb 2026

MCB Bank Limited

- Analyzed complex business workflows and developed the understanding of banking system services.
- Developed understanding of cybersecurity frameworks, banking security standards, and real-world InfoSec workflows.
- Assisted the Information Security team in monitoring security controls, access management, and compliance with internal security policies and banking regulations.

EDUCATION

Bachelor in Computer Science

2022 – 2026

FAST - National University of Computer & Emerging Sciences

Diploma in Cloud Native Agentic AI Engineering

2024 – 2026

PIAIC - Presidential Initiative For Artificial Intelligence & Computing

CERTIFICATIONS

- Introduction to Deep Learning with PyTorch | DataCamp | 2025
 - Muti-AI Agent Systems with CrewAI | DeepLearning AI | 2025
 - LangChain for LLM Application Development | DeepLearning AI | 2025
 - Docker Training Course For Absolute Beginner | KodeKloud | 2025
-

PROJECTS

Vigilant Driver: AI Based Driver Monitoring & assurance System

May 2026

Backend & AI Lead Developer **Link:** vigilant-driver.vercel.app/

- It's a full-stack fleet safety platform (FastAPI backend, React/Vite dashboard, React Native driver app) that monitors sessions and triggers safety alerts.
- Includes an AI pipeline (Bi-LSTM-based fatigue/distraction classification and on-device inference) to classify driver drowsiness/distraction in real time.
- It includes ML training components and an AI advisor service, enabling companies to monitor drivers, manage vehicles, review sessions/events, and act on safety alerts.

Automated Newsroom (Faxum Press) - Agentic AI

June 2026

AI Lead Developer **Github Link:** [Automated-Newsroom](#)

- Built an end-to-end Agentic AI-powered newsroom platform using FastAPI, LangChain, and Google Gemini LLM that auto-fetches and displays trending news for 28 countries without any user input, mirroring the behaviour of Google News and BBC.
- Implemented a RAG pipeline using HuggingFace embeddings and ChromaDB to enable context-aware Q&A over live news articles.
- Designed a agnostic LLM layer (llm.py) that abstracts the AI vendor so the entire system can switch from Gemini to any LangChain-compatible model.

Real Estate Management System with Real-time Chat

Nov 2024

Lead Developer **Github:** [Real Estate Management](#)

- Led a 6-month project to built a full-stack real estate management platform using Node.js, Express, MYSQL, and jQuery with role-based and Integrated real-time chat using WebSockets and Socket.IO for instant tenant-landlord communication.
-

AWARDS & CERTIFICATIONS

- Winner in Data Dash Competition.
- Holds multiple Certificates of Competitive Programming.
